

## LIST OF FIGURES

Figure 1.1.1 The Central and Southern Florida Region.....	2
Figure 1.1.2 The Central and Southern Florida Regional Flow Characterization .....	3
Figure 1.2.1 Evolution of the South Florida Water Management Model .....	7
Figure 1.3.1 South Florida Water Management Model Boundaries.....	10
Figure 1.3.2 General Hydrologic Processes in the South Florida Water Management Model....	12
Figure 1.3.3 Simplified Flowchart for the South Florida Water Management Model v5.5 .....	13
Figure 1.3.4 The South Florida Water Management Modeling System.....	17
Figure 1.3.5 Major Geographical Areas within the South Florida Water Management Model ..	18
Figure 2.1.1.1 Sources of Topography for South Florida Water Management Model v5.5 .....	21
Figure 2.1.1.2 Total Number of Data Points per South Florida Water Management Model Cell for the High-Accuracy Data Collection.....	22
Figure 2.1.1.3 Total Number of Data Points per South Florida Water Management Model Cell for the United States Geological Survey LIDAR Data .....	24
Figure 2.1.1.4 Location of Transects of Measured Subsidence in the Everglades Agricultural Area (Shih et. al., 1997) .....	25
Figure 2.1.1.5 South Florida Water Management Model v5.5 Grid Cell Elevation Values.....	27
Figure 2.1.2.1 1988 Land Use Map .....	29
Figure 2.1.2.2 2000 Land Use Map .....	30
Figure 2.1.2.3 2050 Land Use Map .....	31
Figure 2.1.2.4 Data Source for Vegetative Classes .....	32
Figure 2.1.2.5 Examples of Ridge & Slough II Landscape .....	35
Figure 2.1.2.6 Examples of Ridge & Slough III Landscape.....	35
Figure 2.1.2.7 Examples of Ridge & Slough IV Landscape.....	36
Figure 2.1.2.8 Examples of Ridge & Slough V Landscape .....	36
Figure 2.1.2.9 Example of Mixed Cattail and Sawgrass Landscape .....	37
Figure 2.2.1.1 Location of Rainfall Stations.....	40
Figure 2.2.2.1 Example of TIN-10 Estimation for Model Grid Cell .....	44
Figure 2.2.2.2 Grid Values of Annual Average Rainfall .....	45
Figure 2.2.2.3 Monthly Mean with 10 <sup>th</sup> and 90 <sup>th</sup> Percentile Bars for Rainfall .....	46
Figure 2.3.1.1 Selected K <sub>r</sub> Values for 17 National Oceanic and Atmospheric Administration Stations with Long-Term Daily Temperature Data.....	50
Figure 2.3.1.2 Estimated Annual Average Wet Marsh Potential Evapotranspiration for a 2-mile x 2-mile Super-Grid Which Includes the South Florida Water Management Model and Natural System Model Grids.....	51
Figure 2.3.2.1 Conceptual Representation of the Different Lake Okeechobee Evapotranspiration Zones as Implemented in the South Florida Water Management Model.....	55
Figure 2.3.4.1 KFACT as a Function of Water Table Location .....	57
Figure 2.3.5.1 2000 Fraction of Landscape Irrigation from Public Water Supply Map.....	64
Figure 2.3.5.2 2000 Fraction of Landscape Irrigation from Wastewater Reuse Map .....	65
Figure 2.3.5.3 2000 Fraction of Golf Course Irrigation from Wastewater Reuse Map .....	66
Figure 2.4.2.1 Location of Grid (Source and Destination) Cells Used in Calculating Total Head at Grid Cell (i,j) During Time Step t+1 as Implemented in the Overland Flow Subroutine in the South Florida Water Management Model ..	71

Figure 2.4.2.2 Effective Roughness (N) Values for Mixed Cattail and Sawgrass.....	73
Figure 2.5.3.1 Canal-Levee Configuration Representing a Typical Transect Used in Developing Empirical Levee Seepage Equations in the South Florida Water Management Model .....	77
Figure 2.5.3.2 Sections or Transects Across the Major Levees Used to Formulate Levee Seepage Equations in the South Florida Water Management Model.....	78
Figure 2.5.4.1 Surficial Aquifer Transmissivity Map for the South Florida Water Management Model (v5.5) .....	82
Figure 2.5.5.1 Location of Grid Cells Used in Calculating Total Head at Grid Cell (i,j) During Time Step t+1 as Implemented in the Groundwater Flow Subroutine in the South Florida Water Management Model .....	86
Figure 2.5.5.2 Generalized Block Diagram of Surface-Subsurface Interaction in the South Florida Water Management Model .....	89
Figure 2.6.2.1 Canal Profiles Showing Head Drop .....	93
Figure 2.6.2.2 Conceptual Diagram for Calculating Flow in Determination of Slope for Dynamically Dimensioned Canal Reaches .....	94
Figure 2.7.2.1 Lake Okeechobee Boundary Conditions, South Florida Water Management Model v5.5.....	98
Figure 2.7.2.2 Upper Kissimmee River Basin .....	99
Figure 2.7.2.3 Monthly Upper Istokpoga to Lake Okeechobee Flow Regression Analysis.....	100
Figure 2.7.2.4 Monthly Taylor Creek/Nubbin Slough Flow Regression Analysis.....	101
Figure 2.7.2.5 Daily Taylor Creek/Nubbin Slough Flow Regression Analysis.....	102
Figure 2.7.3.1 South Florida Water Management Model Gridded Boundary Conditions.....	105
Figure 2.7.3.2 Schematic Representation of the L-3 Flow Locations .....	107
Figure 2.7.3.3 S-190 in Relationship to Seminole Big Cypress Reservation .....	108
Figure 2.7.3.4 Tidal Stations Used to Define Coastal Boundary Conditions for the South Florida Water Management Model .....	110
Figure 2.7.3.5 Mean Monthly Tidal Data used to define the South Florida Water Management Model Tidal Boundary .....	111
Figure 3.1.1.1 Lake Okeechobee Stage-Area-Storage Relationships .....	114
Figure 3.1.3.1 Lake Okeechobee Run 25 Regulation Schedule .....	116
Figure 3.1.3.2 WSE Regulation Schedule .....	121
Figure 3.1.3.3 WSE Decision Tree for Lake Okeechobee Discharges to WCAs .....	122
Figure 3.1.3.4 WSE Decision Tree for Lake Okeechobee Discharges to C-43 and C-44s .....	123
Figure 3.1.4.1 Schematic Diagram of Caloosahatchee Basin/Estuary Simulation Module.....	125
Figure 3.1.4.2 Schematic Diagram of St. Lucie Basin/Estuary Simulation Module .....	127
Figure 3.2.1.1 Lake Okeechobee Service Area Basins around Lake Okeechobee .....	130
Figure 3.2.1.2 South Florida Water Management Model Grid Superimposed on Major Basins in the Everglades Agricultural Area .....	131
Figure 3.2.1.3 Conceptual Diagram of the Hydrologic System in the Everglades Agricultural Area as Represented in the South Florida Water Management Model.....	132
Figure 3.2.2.1 Conceptual Representation of an Everglades Agricultural Area Grid Cell in the South Florida Water Management Model .....	133
Figure 3.2.2.2 Variation of Total Evapotranspiration, ET <sub>0</sub> , as a Function of Depth .....	136

Figure 3.2.3.1 Canal-Structure Configurations Used in Calculating Canal Conveyance Capacities for the Everglades Agricultural Area Algorithm in the South Florida Water Management Model .....	145
Figure 3.2.5.1 Location of Stormwater Treatment Areas .....	149
Figure 3.2.5.2 Flow Distribution within and Around the Everglades Agricultural Area with Stormwater Treatment Areas Fully Constructed.....	150
Figure 3.3.2.1 AFSIRS/WATBAL Conceptualization at Field Scale .....	154
Figure 3.3.2.2 AFSIRS/WATBAL Conceptualization of Field Scale to Basin Scale Translation.....	155
Figure 3.3.2.3 Single Basin Implementation of AFSIRS/WATBAL .....	156
Figure 3.3.3.1 Caloosahatchee (C-43) Basin Implementation of AFSIRS/WATBAL.....	157
Figure 3.3.6.1 Relationship between TCNSQrev, TCNSQ and NLKSHOREdmd/ro.....	159
Figure 3.3.8.1 Lake Okeechobee Regulation Schedule with Supply-Side Management Line..	161
Figure 3.4.1.1 Surface Water Management Basins in the Everglades: Water Conservation Areas and Everglades National Park .....	164
Figure 3.4.1.2 WCA-1 Basin Boundary, Canals and Water Control Structures.....	165
Figure 3.4.1.3 WCA-2A Basin Boundary, Canals and Water Control Structures.....	167
Figure 3.4.1.4 WCA-2B Basin Boundary, Canals and Water Control Structures .....	168
Figure 3.4.1.5 WCA-3A Basin Boundary, Canals and Water Control Structures.....	170
Figure 3.4.1.6 WCA-3B Basin Boundary, Canals and Water Control Structures .....	171
Figure 3.4.1.7 Everglades National Park Basin Boundary, Canals and Water Control Structures.....	172
Figure 3.4.2.1 SFWMM Grid Cell Network with Model Boundary .....	174
Figure 3.4.2.2 Regulation Schedule for Water Conservation Area 1 .....	176
Figure 3.4.2.3 Regulation Schedule for Water Conservation Area 2A .....	177
Figure 3.4.2.4 Regulation Schedule for Water Conservation Area 3A .....	178
Figure 3.4.2.5 Regulation Schedule for Water Conservation Area 1, 2A, and 3A.....	179
Figure 3.4.2.6 Example of Translation for Hydrograph Targets .....	187
Figure 3.4.2.7 Example of Truncation for Hydrograph Targets .....	188
Figure 3.4.2.8 Examples of Import Offset for Hydrograph Targets .....	189
Figure 3.4.2.9 Examples of Export Offsets for Hydrograph Targets.....	190
Figure 3.4.2.10 Potential Import and Export Trigger Sites from Natural System Model.....	191
Figure 3.4.2.11 Flow Routing Associated with Example Triggers for Everglades Rain-Driven Operations .....	192
Figure 3.5.2.1 Primary Structures Used in Making Water Supply Deliveries to the Three Service Areas within the Lower East Coast .....	194
Figure 3.5.2.2 Hypothetical Canal Network Used to Explain Water Supply Needs Calculations in the South Florida Water Management Model .....	195
Figure 3.5.2.3 Sequence of Water Supply Needs Calculations for the Hypothetical Canal Network .....	199
Figure 3.5.3.1 Systems Diagram of Processes Simulated in the South Florida Water Management Model for Irrigated Cells within the Lower East Coast Service Area .....	203
Figure 3.5.4.1 Location of Key Trigger Cells in the South Florida Water Management Model Used to Trigger Water Restrictions in the Lower East Coast Developed Area .....	206

Figure 3.5.5.1 Distribution of Annual Average Public Water Supply Pumpage (1996-2000) in the Lower East Coast Based on the South Florida Water Management Model Grid Network .....	209
Figure 3.6.1.1 Example Trigger Lines for Proposed Lake Okeechobee Aquifer Storage and Recovery.....	213
Figure 3.6.1.2 Measles Map Showing Spread of Aquifer Storage and Recovery Wells .....	216
Figure 3.6.2.1 Logarithmic Relationship between Everglades Agricultural Area Nine-Station Average Rainfall for Water Years 1995-2000 .....	218
Figure 3.6.2.2 Annual Time Series of Everglades Agricultural Area Nine-Station Average Rainfall from Best Management Practices Rule .....	219
Figure 3.6.2.3 South Florida Water Management Model Grid Values of Initialized Stage .....	222
Figure 3.6.2.4 Historical Traces of Stage Predictions in Lake Okeechobee.....	223
Figure 3.6.2.5 Historical Traces Re-Initialized to Starting Conditions for Lake Okeechobee..	224
Figure 3.6.2.6 Conditional and Unconditional Position Analysis Stage Predictions for Lake Okeechobee .....	224
Figure 4.1.1.1 Miami River Basin Unsaturated Zone Storage Triggers for Runoff and Supplemental Flow as Implemented in the SFWMM .....	229
Figure 4.1.2.1 Calibrated Annual Runoff and Supplemental Flow for the EAA.....	230
Figure 4.1.2.2 Verified Annual Runoff and Supplemental Flow for the EAA .....	230
Figure 4.1.2.3 Calibrated Daily Runoff and Supplemental Flows for the EAA .....	231
Figure 4.1.2.4 Verified Daily Runoff and Supplemental Flows for the EAA .....	231
Figure 4.1.2.5 Calibrated Daily Historical and Simulated EAA Runoff .....	232
Figure 4.1.2.6 Verified Daily Historical and Simulated EAA Runoff.....	232
Figure 4.1.2.7 Calibrated Daily Historical and Simulated EAA Supply .....	233
Figure 4.1.2.8 Verified Daily Historical and Simulated EAA Supply.....	233
Figure 4.1.2.9 Calibrated Flow Duration – Daily EAA Runoff.....	234
Figure 4.1.2.10 Verified Flow Duration – Daily EAA Runoff.....	234
Figure 4.1.2.11 Calibrated Flow Duration – Daily EAA Supply.....	235
Figure 4.1.2.12 Verified Flow Duration – Daily EAA Supply .....	235
Figure 4.1.2.13 Calibrated Mean Monthly Runoff and Supply Comparison.....	236
Figure 4.1.2.14 Verified Mean Monthly Runoff and Supply Comparison.....	236
Figure 4.1.2.15 Calibrated Monthly Runoff and Supplemental Flows for the EAA .....	237
Figure 4.1.2.16 Verified Monthly Runoff and Supplemental Flows for the EAA .....	237
Figure 4.1.2.17 Calibrated Monthly Historical and Simulated EAA Runoff .....	238
Figure 4.1.2.18 Verified Monthly Historical and Simulated EAA Runoff.....	238
Figure 4.1.2.19 Calibrated Monthly Historical and Simulated EAA Supply .....	239
Figure 4.1.2.20 Verified Monthly Historical and Simulated EAA Supply .....	239
Figure 4.2.1.1 Location of Stage Calibration and Verification Sites.....	243
Figure 4.2.1.2 Locations of Flow Validation Sites .....	244
Figure 4.2.2.1 Example Time Series Figures for Water Level Calibration and Verification ...	256
Figure 4.2.2.2 Example Time Series Figures for Flow Validation.....	257
Figure 4.2.2.3 Calibration Correlation .....	258
Figure 4.2.2.4 Verification Correlation.....	259
Figure 4.2.2.5 Calibration Bias .....	260
Figure 4.2.2.6 Verification Bias.....	261
Figure 4.3.1.1 Measured vs. Modeled Caloosahatchee Demand.....	266

Figure 4.3.1.2 Seasonal Variability in Caloosahatchee Demand.....	266
Figure 4.3.1.3 Time Series of Monthly Caloosahatchee Demand and Accumulation.....	267
Figure 4.3.1.4 Measured vs. Modeled Caloosahatchee Runoff .....	268
Figure 4.3.1.5 Seasonal Variability in Caloosahatchee Runoff.....	268
Figure 4.3.1.6 Time Series of Monthly Caloosahatchee Runoff and Accumulation.....	269
Figure 4.3.2.1 Measured vs. Modeled Brighton/Istokpoga Demand .....	272
Figure 4.3.2.2 Seasonal Variability in Brighton/Istokpoga Demand.....	272
Figure 4.3.2.3 Time Series of Monthly Brighton/Istokpoga Demand and Accumulation.....	273
Figure 4.3.3.1 Seasonal Variability in Feeder Canal Basin Runoff.....	277
Figure 4.3.3.2 Time Series of Monthly Feeder Canal Basin Runoff and Accumulation.....	278
Figure 4.3.3.3 Seasonal Variability in Feeder Canal Basin Demand.....	278
Figure 5.2.1 Sensitivity Percentile in terms of Bias to Variation of Wetland Potential Evapotranspiration in Water Conservation Areas .....	281
Figure 5.2.2 Sensitivity Percentile in terms of Root Mean Square Error to Variation of Wetland Potential Evapotranspiration in Water Conservation Areas .....	282
Figure 5.2.3 Components of the Sensitivity Matrix for Big Cypress National Preserve.....	283
Figure 5.2.4 Components of the Sensitivity Matrix for Everglades National Park .....	284
Figure 5.2.5 Components of the Sensitivity Matrix for Water Conservation Areas.....	284
Figure 5.2.6 Components of the Sensitivity Matrix for Lower East Coast Service Area 1 .....	285
Figure 5.2.7 Components of the Sensitivity Matrix for Lower East Coast Service Area 2.....	285
Figure 5.2.8 Components of the Sensitivity Matrix for Lower East Coast Service Area 3.....	286
Figure 5.2.9 Components of the Sensitivity Matrix for Canals .....	287
